# International E-car Rally

from home to Frankfurt

## April 22, 2020

Start at your own location  
Finish 18:00h in Frankfurt

## Why accept the challenge?!

Because your trip to Frankfurt will be fun and CO2-neutral, will provide you with valuable promotional material and a super personal learning experience. Learn and inspire the people in your network to drive all electric!

### How does it work?

1. Travel with your own (shared) electric car.
2. Use the unique app we provide you with to track the movement of your car. On the corresponding website you can follow the route traveled, average speed and the distance traveled in real time. You can also record events and provide them with a 'selfie', an other image and/or a comment line.
3. Earn points in the classic rally, for example by visiting a landmark, per kilometer driven and per car swap
4. Earn points in the creative challenge, for example by making a video of photo reportage of a group member charging the car or visiting a REScoop member.

### What does it cost?

Standard package € 250

Expanded package € 495
